

Norway

Norway Water Butt

Real wooden shingles and Nordic spruce were the inspiration for this truly unique water butt. Due to its slim form and the small footprint, there will be space for it in the even smallest garden. With a volume of 230 litres (60 gallons) and a height of 130 cm it fits next to garden sheds or alongside lap panel fencing.

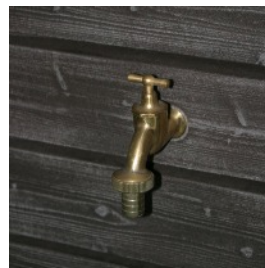

The use of good quality, weather proofed PE results in a very natural looking butt, with a realistic wood effect finish.

The 3P water butt "Norway" comes with a $\frac{3}{4}$ " brass threaded connection point for a screw in taps and a side outlet for draining or connecting to another rain tank.

Dimensions

Height 130 cm
Width 60 cm
Depth 40 cm

Capacity 230 Litres (60 gallons)

Product Code: 9000382K

Slimline wood effect
